**20a. How does the Committee accomplish its purpose?**

Section 492 of the PHS Act states that the Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications...; and (B) biomedical and behavioral research and development contracts... This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and contract proposals in the fields of research pertaining to the causes and treatment of eye diseases and disorders. These grants and contracts support special research programs that include investigator-initiated applications, clinical trials, centers, institutional NRSA training grants, SBIR, conference proposals and special development award programs. During the reporting period, the committee reviewed 319 applications requesting \$472,608,542.

**20b. How does the Committee balance its membership?**

This committee has a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. The reviewers for each meeting are selected to evaluate grant applications and/or contract proposals for a specific, perhaps narrow, expertise area. Participants for each meeting are assembled to most efficiently cover the number and breadth of applications or proposals requiring review.

**20c. How frequent and relevant are the Committee Meetings?**

The National Eye Institute Special Emphasis Panel held 21 meetings during this period.

## **20d. Why can't the advice or information this committee provides be obtained elsewhere?**

This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and contract proposals. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth and depth of expertise not available on the NIH staff or from other established sources.

## **20e. Why is it necessary to close and/or partially closed committee meetings?**

The meetings of the committee were closed to the public for the review of grant applications. Section 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

## **21. Remarks**

Reports: This committee did not produce any public reports during the fiscal year. URL: This committee does not have a website. Due to the large number of members and meetings associated with this specific committee, NIH is not able to comply with the Committee Management Secretariat's request to supply zip codes for individual members. Current individual meeting rosters are available on line at: <http://public.era.nih.gov/pubroster>. Past individual meeting rosters are available by contacting the DFO.

## **Designated Federal Officer**

### Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the Public Health Service Act states that “The Secretary...shall by regulation require appropriate technical and scientific peer review of-(A) applications...; and (B) biomedical and behavioral research and development contracts...”

**Action Comments**

An action of "approved" or "recommended" for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.

**Is the Committee engaged in the review of applications for grants?**
